EDUCATION

Baderia Global Institute of Engineering and Management

Madhya Pradesh, India

B.Tech - Computer Science and Engineering (Artificial Intelligence and Machine Learning)

Sept 2023 - July 2027

EXPERIENCE

AI Solutions Engineer Intern

May 2025 – May 2026

Mittal Alliance Pvt Ltd

Indore

- Engineered 10+ AI-powered automation solutions and Generative AI workflows for international clients across diverse industries
- Developed LLM-based automation pipelines and reusable prompt frameworks to streamline business operations
- Architected AI systems for marketing, lead generation, customer engagement, and workflow automation
- Collaborated with cross-functional teams to deliver scalable AI solutions and optimize client processes

Python Developer Intern

June 2024 – April 2025

Mech Buddy

Jabalpur

- Developed Django-based backend systems with REST APIs and SQL database integration
- Built authentication modules, admin dashboards, and CRUD functionalities for production applications
- Optimized backend logic and database queries to improve application performance
- Resolved bugs and implemented new features to enhance application stability

PROJECTS

Blockchain-Based Chemical Tracking System | *Python, Django, Ethereum, Solidity, Web3.py*

- Engineered a blockchain-enabled chemical traceability platform integrating Ethereum smart contracts, MetaMask authentication, and Django backend services.
- Integrated Ethereum smart contracts with MetaMask and Web3.py to ensure secure, tamper-resistant transaction verification.
- Built tamper-proof audit trails and real-time monitoring dashboards

AI Business Automation Platform | *Python, Generative AI*

- Designed AI-powered workflow automation systems leveraging prompt engineering and large language models to streamline business operations.
- Designed prompt engineering frameworks for marketing, CRM, and customer support
- Developed reusable AI systems to streamline operational processes

EEG-Based Seizure Detection using Deep Learning | *Python, TensorFlow, Deep Learning*

- Designed and implemented a Transformer-enhanced CNN-LSTM architecture for epileptic seizure prediction using EEG signal processing and deep learning.
- Implemented preprocessing, feature extraction, GAN-based data augmentation, and deep neural network classification
- Conducted extensive model evaluation using public EEG datasets and Published research findings in IEEE demonstrating Transformer-based temporal enhancement for EEG seizure prediction.

PUBLICATIONS

Transformer-Based Temporal Enhancement for CNN-LSTM Networks in Epileptic Seizure Prediction

- Developed Transformer-enhanced CNN-LSTM/BiLSTM models for EEG seizure prediction, achieving 99.42% accuracy on the CHB-MIT dataset
- DOI:** 10.1109/IC-EETA66496.2025.11547990

TECHNICAL SKILLS

Languages & Frameworks: Python, SQL, JavaScript, HTML5, CSS3, Django, Django REST Framework, REST APIs

AI/ML & Blockchain: Machine Learning, Deep Learning, TensorFlow, Scikit-learn, Pandas, NumPy, Generative AI, Prompt Engineering, Ethereum, Solidity, Web3.py

Databases, Tools & CS Fundamentals: PostgreSQL, MySQL, Git, GitHub, Linux, VS Code, Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
